WE NOW CARRY MAPEI GRANIRAPID MORTAR & ULTRACOLOR GROUT

Granirapid
Flexible mortar

Ultracolor
Plus FA Grout

"Granirapid is the next generation of high performance, flexible mortar systems. As the industry's first and only fast curing system geared to fast-track projects, it develops high, early mechanical strength and can be specified for the same demanding applications as Kerilastic. However, Granirapid will cure considerably faster because of its superior drying-out characteristics, which produce low residual moisture behind the tile after 24 hours, and does not contribute to efflorescence. When installed in conjunction with Ultracolor Plus grout, Granirapid will allow water submersion in a revolutionary 72 hours."
